+91 7735287196 | gurupadanayak@hotmail.com | gurupadanayak.in | [GitHub](#) | [LinkedIn](#)

PROFILE

Junior software engineer with an MCA from Berhampur University (CGPA 8.8, top 5%). Designs and ships secure, scalable systems with Spring Boot, REST APIs, and relational databases. Strong problem-solving and analytical skills, with attention to detail across the stack and a growing focus on AI/ML and DevOps in product workflows.

EDUCATION

Berhampur University

Master of Computer Applications (MCA) • CGPA: 8.8 • Top 5% of batch

Berhampur, Odisha

2024 – 2026

FM Autonomous College, Balasore

Graduation, General Studies

Odisha, India

2019 – 2022

TECHNICAL SKILLS

Languages: Java, Python, SQL, Kotlin, JavaScript

Backend: Spring Boot, Spring Data JPA, REST APIs, JDBC, Hibernate, JWT Authentication

Databases: MySQL, PostgreSQL, MongoDB

Frontend: HTML, CSS, Tailwind CSS, React (basics)

AI / ML (learning): Python, NumPy, Pandas, Scikit-learn, TensorFlow

Tools & Cloud: Git, GitHub, Maven, IntelliJ IDEA, Postman, Apache POI, Docker

Concepts: OOP, System Design (learning), Backend Architecture, Debugging, Unit Testing

PROJECTS

Vidyapeeth — Multi-Tenant SaaS for Coaching Centers

Jun 2026 – Present

Java, Spring Boot, JWT, PostgreSQL, React, Docker | vidyapeeth.in

- Architected a **multi-tenant SaaS** now **running 5–7 coaching institutes** from one codebase, using **shared-database tenant isolation** (Hibernate `@Filter` + institute-scoped repositories) with branded portals on **wildcard subdomains**.
- Institutes actively host live mock tests and share study materials on the platform; built **JWT role-based access** (super-admin / institute-admin / student), **auto-graded tests** across four question types with leaderboards, and **Excel bulk import** via Apache POI.
- Deployed on **Render** (Dockerized Spring Boot) and **Vercel** (React) with **Supabase PostgreSQL & Storage**, Flyway migrations, and a custom domain over SSL.

Suraag — Offline-First Music Streaming

Jan – May 2026

Kotlin, Spring Boot, JWT, AES, ExoPlayer, PostgreSQL | suraagmusic.in

- Built a secure, offline-first music streaming app with **JWT authentication** and **AES (with IV) encrypted audio delivery** between an Android client and Spring Boot backend. Currently used by **50–70 daily active users**, with **3–5 new downloads a day**.
- Engineered seamless playback with ExoPlayer that automatically falls back to cached audio when connectivity drops, eliminating playback interruptions.
- Designed REST APIs for streaming, content handling, and metadata; migrating to scalable cloud storage with optimized caching.

CBCT Allocation System

Oct – Nov 2025

Java, Spring Boot, Spring Data JPA, MySQL, Apache POI | [GitHub](#)

- Built a **first-come, first-served seat allocation engine** used **locally by the university** each year to allocate CBCT papers to students, ingesting preferences from Google Forms / Excel and producing deterministic results.
- Implemented persistence with Spring Data JPA over MySQL, automated Excel export of results, and exposed REST APIs for admin tool integration.

CERTIFICATIONS

- Java Backend Development with Spring Boot, Microservices & AI Tools** — GeeksForGeeks (Jul 2026) | [Link opens on GeeksForGeeks](#)
- Machine Learning with AI** — National Skill Development Corporation (Oct 2025) | [Link opens on NSDC](#)
- Fundamentals of Object-Oriented Programming** — NPTEL (May 2025) | [Link opens on NPTEL](#)
- Java with DSA and System Design 2.0** — PW Skills (2024) | [Certificate](#)
- 100% Job Ready Java Full Stack Live Course** — Code for Success (2024)

ACHIEVEMENTS

- Published and maintained multiple production Java projects on GitHub with clean code and clear documentation.
- Completed **NCC B & C Certificates** — demonstrating leadership, discipline, and teamwork.
- Led team in dissertation project, demonstrating cross-functional collaboration.
